The ultimate desktop MFA for ForgeRock environments

Simple and secure MFA for any domain-connected workstation

Easy path to a fully passwordless enterprise at any point

Reduces employee downtime and helpdesk support costs

Synchronizes fully with the ForgeRock Identity Platform

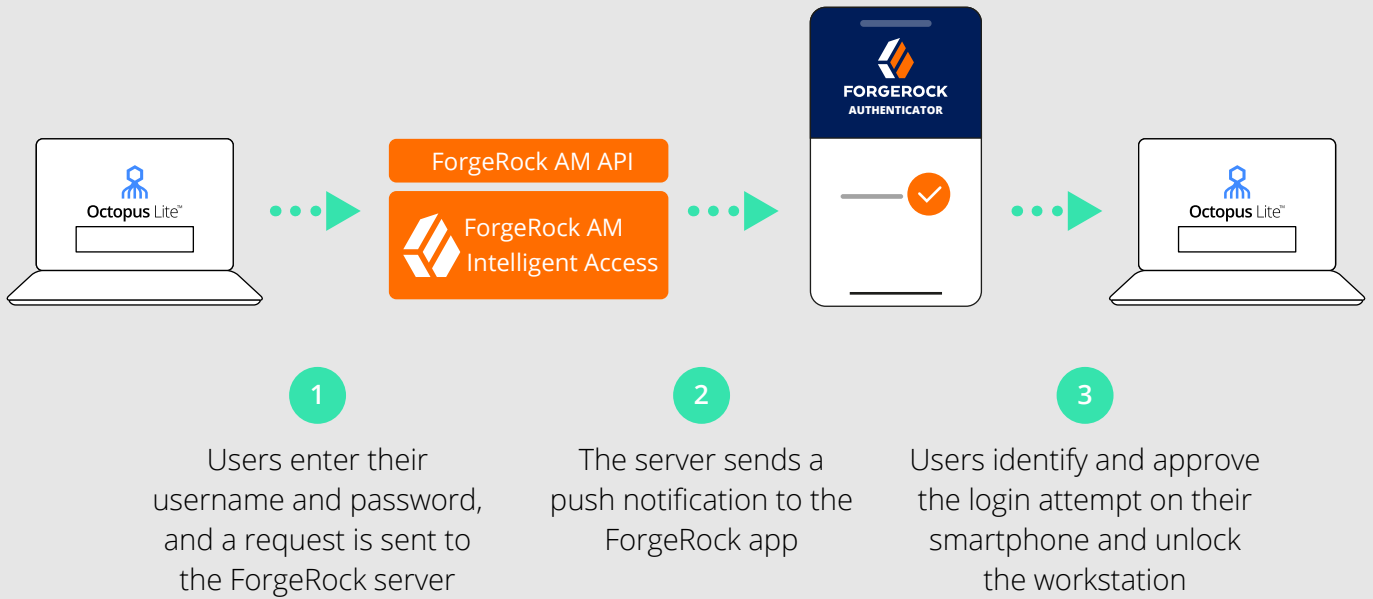

Plug and Play – fast and easy deployment that delivers on day one

A familiar experience - Uses employees' existing ForgeRock app

HOW IT WORKS

 **WATCH IT IN ACTION**

ABOUT US

Secret Double Octopus is the passwordless solution for enterprises. Founded in 2015 by leading researchers and veterans of the IDF's cyber unit, and backed by top international VCs, the company manages to do what was thought to be impossible with passwordless authentication in Fortune50 companies and mid-sized companies throughout the world.

A POWERFUL PARTNERSHIP

By integrating fully into existing ForgeRock setups, the Octopus platform brings a groundbreaking authentication technology to enterprise clients of the biggest scale, enabling the next step of digital transformation. A single unified solution covering authentication, identity and access management for the entire organization with no gaps to fill - starting with the endpoint and covering any business system on prem or in the cloud.

Secret Double Octopus's technology gives us the ability to offer a universal and highly secure authentication solution. Its unique integration with ForgeRock represents a huge step forward in security and productivity for our clients.

Terence Siau, CEO of Tindo Group
